DEPARTMENT OF THE AIR FORCE
42D AIR BASE WING (AETC)
MAXWELL AIR FORCE BASE ALABAMA

MEMORANDUM FOR MAXWELL-GUNTER ALL

FROM: 42 ABW/CV

SUBJECT: 2017 Consumer Confidence Report (CCR) on Drinking Water for Maxwell AFB, Gunter Annex, Vigilant Warrior Training Site and Maxwell-Gunter Recreational Areas

1. Each year, in accordance with (IAW) AFI 48-144, *Drinking Water Surveillance Program*, all Air Force drinking water systems are required to send out a CCR highlighting the previous calendar year's sample results and water treatment processes. As in the past, our water continues to be of high quality and meet all Safe Drinking Water Act requirements.

2. IAW AFI 48-144, installations which receive a Water Quality Report (WQR) or a CCR from a local water supplier will provide the WQR/CCR to the base population. Maxwell AFB and Gunter Annex receive their water from the Montgomery Water Works and Sanitary Sewer Board. The Lake Martin recreational site, Vigilant Warrior training site near Lake Jordan, and Mid Bay Shores, Florida recreational site receive their water from Walnut Hill Water Authority, Central Elmore Water and Sewer Authority and Okaloosa County Water Authority. Each of the respective WQRs/CCRs can be found on the web page for each water authority. Links are provided in the attachment.

3. In addition to the sampling performed by the local water suppliers, our Bioenvironmental Engineering (BE) Flight collected an additional 234 drinking water samples in 2017, analyzing for pH, chlorine, fluoride and bacteriological contaminants.

4. If there are any questions concerning this letter, or any of the information contained within any of the WQRs/CCRs, please contact BE at COMM: (334) 953-5848 or E-mail at usaf.maxwell.42-mdg.mbx.amds-sgpb@mail.mil. Please help the flight improve by completing a customer satisfaction comment card at http://go.usa.gov/ZE7w.
