

**BY ORDER OF THE COMMANDER
42D AIR BASE WING (AETC)**

AETC INSTRUCTION 10-205

MAXWELL AFB SUPPLEMENT 1

31 OCTOBER 2002

Operations

AETC EXERCISE PROGRAM

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

NOTICE: This publication is available digitally on the 42d Communications Squadron web site at: <http://www.maxwell.af.mil/42abw/42cs/>. If you lack access, contact the Publications Management office.

OPR: 42 ABW/XP
(Lt Col Gordon Bennett)

Certified by: 42 ABW/CC
(Col Frances C. Martin)

Pages: 23

Distribution: F

AETCI 10-205, 21 April 1997, is supplemented as follows:

3.1. (Added) All 42 ABW assigned and Maxwell/Gunter tenant units will maintain a copy of AETCI 10-205 and this supplement. 42 ABW/XP will ensure the ABW/CC, CV, and Crisis Action Team (CAT) coordinator has copies of this supplement readily available during CAT operations. Additionally, 42 ABW/XP will ensure copies of this supplement are available to other CAT members and unit control centers (UCCs). This supplement supersedes 42 ABW Exercise Ground Rules memo dated March 97.

6.2.1.1. (Added) Commanders must designate a new BEET member 30 days before the removal of a predecessor from the team.

18.8.1. (Added) All telephone and radio communications will begin and end with the phrase **“THIS IS AN EXERCISE”**; **“EXERCISE”**; or **“EXERCISE MESSAGE.”**

18.8.2. (Added) Simulate notification or coordination with agencies outside the 42 ABW by calling the **BEET SWITCH**. Prepare all required reports and submit to the CAT director. **DO NOT** transmit any reports off station, unless directed by higher headquarters.

18.9. (Added) Use actual surface winds for all exercises, unless directed otherwise.

27.3. (Added) Use of damaged or destroyed equipment is prohibited unless specifically approved by the BEET Chief.

27.5. (Added) Compliance with established communications instructions is mandatory during nuclear weapon accident scenarios.

27.6. (Added) Use rope to simulate deployment of oil booms during Civil Engineering response to exercises requiring oil spill containment equipment.

27.7. (Added) Exercise casualty notification and reporting procedures to fullest practical extent; e.g., positive identification, commander notification, messages, casualty notification team composed.

27.8. (Added) Voluntary participation by on-base dependents and other civilians in base level exercises is encouraged.

28.1. (Added) Simulate shut down of base utilities (if necessary), by identifying the points to shut down and dispatching personnel to physically touch the controls.

28.2. (Added) Activation of the base siren system must be pre-announced, and approved by the wing commander. NOTE: Do not activate the base siren during inclement weather conditions.

28.3. (Added) Simulate all computer outages.

28.4. (Added) Under normal conditions, return of prisoners to the Federal Prison Camp will be simulated. However, if pre-coordinated with prison leadership, return of prisoners may be included in the exercise scenario.

29.1 (Added) During DEPLOYEX, the issue and loading of chemical bags will be simulated.

31.1. (Added) During FPCON exercises, the CAT may direct movement of vehicles 25 meters from buildings at pre-determined priority facilities. Facility custodians must demonstrate the capability to evacuate parking lots by (at a minimum) notifying building occupants of the exercise and posting the visual aid at attachment 3 on stands or cones in the appropriate areas of parking lots.

31.2. (Added) During exercise FPCON CHARLIE and above, the gates to the Transportation and Civil Engineering (CE) vehicle compounds must be closed, and only government owned vehicles (GOVs) allowed inside the compounds. Once compounds and vehicles are purged and entry controls established, the GOVs assigned to CE and Transportation are not required to move 25 meters from the buildings in the compounds.

31.3. (Added) Entry authorization lists are the only valid documentation for unescorted entry to controlled or restricted areas. The lists will contain the name, rank, SSAN, and security clearance of authorized individuals. BEET badges or nametags do not constitute authority to enter controlled/restricted areas or grant access to classified information.

31.4. (Added) AAFES/DECA facilities will post signs at all entrances, but continue normal operations in all FPCON levels.

31.5 (Added) Federal prisoners will not be recalled during any condition.

31.6. (Added) Approved FPCON Simulations

31.6.1. (Added) **FPCON BRAVO:**

31.6.1.1. (Added) The CAT will direct the extent of vehicle relocation. The CAT may elect to relocate only vehicles at predetermined priority facilities.

31.6.1.2. (Added) At the discretion of the CAT, the capability to move trash containers (dumpsters) away from facilities will be demonstrated by contacting the contractor and having one container moved. "Simulated moved" signs (attachment 2) will be placed on the remaining containers located within 25 meters of any facility.

31.6.1.3. (Added) At the discretion of the CAT, CE will simulate the removal/covering of building signs not accessible from ground level. All other building signs will be removed/covered.

31.6.2. (Added) **FPCON CHARLIE: (All FPCON Alpha and Bravo actions plus)**

31.6.2.1. (Added) Simulate closure of service facilities to include: dining halls, clubs, community centers, base theater, and mini-mall. Organization must be able to demonstrate capability at BEET request.

31.6.2.2 (Added) Fully implement ID checks/entry control at University Inn (Bldg. 157) and Brett Hall (DV Quarters).

31.6.2.3 (Added) Simulate checks/entry control of other lodging facilities.

31.6.2.4. (Added) Unless otherwise directed by the CAT, move vehicles only at predetermined priority facilities.

31.6.2.5. (Added) The CAT will determine extent (if any) of base gate closure.

37.1.1 (Added) All requests for simulation must be routed through appropriate the group commander/agency chief to the wing commander for approval. The wing commander may delegate simulation approval authority to the BEET Chief. Use attachment 1 to this document for simulation requests.

37.2.1. (Added) Do **not** simulate exercise activities not specifically addressed in this supplement **unless** actually performing the activity would result in significant unwarranted expenditure of time or

resources, or if actual accomplishment would have a detrimental effect on the safety of daily operations. The wing commander must approve all simulations. The wing commander may delegate approval authority to the BEET Chief.

37.2.2. (Added) When a situation arises not covered by this instruction, the affected agencies should request approval for simulations/limiting factors (LIMFAC) through unit command channels to the wing commander (unless approval authority is delegated to the BEET Chief). Individual BEET evaluators will not approve requests for simulation unless safety or security is a factor.

37.4. (Added) Maxwell AFB approved simulations are:

37.4.1. (Added) Deployment/Force Employment Exercises:

37.4.1.1. (Added) Use simulated cash (i.e., play money, discarded machine cards with dollar amounts annotated, etc.) during exercises not involving actual deployment.

37.4.1.2. (Added) Simulate the movement and distribution of drugs and narcotics by using representative props allowing demonstration of correct procedures.

37.4.1.3. (Added) The Fire Department will keep sufficient fire-fighting equipment on the flight line to support flying operations during exercises (if active flying is in progress).

37.4.2. (Added) Computer and Utilities Outages.

37.4.2.1. (Added) When an exercise scenario includes the sudden loss of base utilities to one or more buildings, the outage(s) will be simulated by telling the occupants not to use the particular utility (i.e., water, electricity, and/or phone, etc.). The BEET will utilize an input card and direct the application a placard to the involved equipment. Facilities with a backup power source may be required to put the alternate source on line and operate the facility on alternate power. (Exceptions must be coordinated in advance with the BEET Team Chief.)

37.4.2.2. (Added) Simulate the intentional cutoff of base utilities by identifying the cut-off points and dispatching personnel to touch the controls. Further use of those utilities is denied.

37.4.2.3. (Added) Simulate exercise computer outages unless the using organization requests actual shutdown. The wing commander is final approval authority for all requests (unless delegated to the BEET Chief).

37.4.2.4. (Added) During scenarios requiring facility communications isolation and/or hostage negotiation line activation; the capability will be demonstrated by pointing out the switch/plug requiring manipulation. Power to the digital multiplexing systems should not be cut-off. Use of a single-line, non-digital telephone, such as a STU-III, will simulate isolated communications.

37.4.3. (Added) Accident and Disaster Sites.

37.4.3.1. (Added) When appropriate use hand grenade simulators and smoke grenades to enhance exercise realism. Fire extinguishers must be readily available where hand grenade simulators or smoke grenades are used.

37.4.3.2. (Added) During on-base exercises simulate the portion of a cordon extending beyond the base perimeter fence. Simulate any portion of a cordon extending across an active runway or taxiway.

37.4.4. (Added) Casualties.

37.4.4.1. (Added) Casualties (sick, wounded, injured, and fatalities) will be simulated by personnel/mannequins wearing moulage, or by input cards indicating the type and extent of wounds or injuries. In mass casualty exercises, casualties will be limited to a ratio of two casualties for each fire/rescue member expected to be available (and not more than one fatality per three casualties). Any exercise requiring identification/notification of fatalities must have actual names to accurately complete the process. Live players will normally use their own identification cards. Mannequins and live role-players other personnel will identification information provided by the BEET Team.

37.4.4.2. (Added) Medical teams may use reusable medical supplies (e.g., splints and bandages), but simulate non-reusable supplies (e.g., medication and needles)

37.4.4.3. (Added) The simulated location for downtown hospitals will be building 841, Health and Wellness Center (Maxwell), and building 810, Medical Center (Gunter Annex). Casualties will be transported to these locations and ambulances held 20 minutes to simulate transport time.

37.4.4.3.1 (Added) Destination for casualties during exercises involving off-base participation will be designated in the exercise SPINs.

37.4.5. (Added) Airfield Operations.

37.4.5.1. (Added) Air Traffic Controllers and Base Operations personnel should not simulate the effects of exercise scenarios on normal daily operations. Carried out appropriate status changes, runway/taxiway closures, Notice to Airmen (NOTAM) transmissions, etc., until directed otherwise by the BEET/IG evaluator. Do not transmit exercise NOTAMs--deliver to the BEET Switch or BEET Team. Consider transmitting "real-world" NOTAMs describing potential delays or other effects of an exercise in progress. The OSS/CC has the authority to override all exercise inputs in order to maintain safe control of resources.

37.4.5.2. (Added) BEET/IG members will not direct the movement of aircraft or distract controllers. BEET/IG will pass inputs through the tower supervisor and/or OSAT.

37.4.5.3. (Added) Runways will remain available for emergency aircraft recoveries. This may require the BEET/IG to artificially relocate emergency response crews, the entry control point, and/or cordon guards. Players should respond as though the situation was real until directed otherwise by the BEET/IG.

37.4.5.4. (Added) No exercise should cause any aircraft to divert. Plan runway/taxiway closures for a duration allowing the wing to demonstrate capabilities without causing aircraft movement problems.

37.4.5.5. (Added) All towing operations will follow all real world safety and Technical Order guidance. For simulated towing, connect to the aircraft; then disconnect, and proceed to the appropriate evacuation area as if the aircraft were in tow. For simulated taxi operations, have all necessary equipment available (such as a power unit) and have qualified personnel available at the aircraft.

38.9.1. (Added) For all local BEET (ACADEMIC SABER) exercises, simulate contact with off-base agencies (HQ, AETC, EOD, etc) by contacting the BEET Switch at the number published in the Master Schedule of Events Listing.

38.9.2. (Added) Use AFJI 11-204, *Operational Procedures for Aircraft Carrying Hazardous Materials*, procedures when simulating radio calls for scenarios involving aircraft carrying hazardous material.

38.10.4. (Added) Suspend outdoor exercise activities if lightning is reported within five miles of the base.

38.10.5. (Added) Wear of reflective belts by all BEET members and exercise participants is mandatory between the hours of dusk and dawn.

38.11.1. (Added) Do not recall personnel exempted from exercises.

38.11.2. (Added) Prepare recall messages but, **do not transmit**. Ensure the messages are marked **“NOT FOR TRANSMISSION”** in the special instruction section.

38.11.3. (Added) Provide one copy of the message to the Personnel Control Center (PCC). The PCC will give the BEET evaluator a copy upon completion of the exercise.

38.11.4. (Added) The PCC and all Unit Control Centers (UCCs) will maintain an events log recording the completion of all significant events and major checklists items. Provide events logs to the BEET for evaluation following the exercise.

38.11.5. (Added) The PCC will provide a copy of recall messages to the personnel representative at the DCC.

38.11.6. (Added) The CAT will decide if shift workers or personnel on crew rest are subject to recall. If exempted, during personnel reporting, squadrons will count these individuals as present for duty.

38.11.7. (Added) Do not recall personnel from leave or temporary duty. Prepare exercise messages but **do not transmit**. Mark recall messages “**NOT FOR TRANSMISSION**” in the special instruction section.

38.13.1. (Added) Medical/dental care. Do not interrupt direct patient care during exercises. Medical and dental personnel, not directly involved with patient care, will respond as necessary.

38.13.2. (Added) The Child Development Centers (CDC) and dependent schools both at Maxwell/Gunter are excluded from all exercises activities unless otherwise directed by the wing commander. However, both the CDC and school will post the appropriate FPCON signs during FPCON exercises.

38.13.3. (Added) Base exchange, commissary, and morale, welfare, and recreation (42 SVS/MWR) facilities are not required to close; however, military patrons should respond to exercises as required. All facilities will post appropriate FPCON signs during FPCON exercises

38.13.4. (Added) Evacuate personnel and equipment to the maximum extent possible. Leave only the minimum number of people required-in the evacuated buildings for security and safety purposes.

38.13.5. (Added) Evacuation of facilities within the cordon (exercise area) is initiated by security forces as necessary. Notification may be by telephone, public address speakers or by personal contact. Each individual in the affected area is responsible for evacuation in an orderly and expeditious manner. For exercise exempt facilities (see attachment 4) within the evacuation area, evacuate all non-essential personnel and comply with the following guidelines:

38.13.5.1. (Added) Entry into the facility during the exercise is restricted to essential personnel and people having legitimate business within the facility.

38.13.6. (Added) Facilities listed in attachment 4 may be evacuated with prior coordination and when operational requirements allow.

38.13.7. (Added) Military Family Housing (MFH) occupants are not required to evacuate unless they choose to participate. If they do not evacuate, they must remain in their quarters until termination of the exercise.

38.14.1 (Added) The BEET will not direct the movement of aircraft.

3814.2. (Added) All towing operations will follow all real world safety and Technical Order guidance. For simulated towing, connect to the aircraft; then disconnect, and proceed to the appropriate

evacuation area as if the aircraft were in tow. For simulated taxi operations, have all necessary equipment available (such as a power unit) and have qualified personnel available at the aircraft.

38.16.1. (Added) The movement and distribution of food, linen and clothing from the Commissary, Base Exchange and Linen Exchange for the stocking of shelters is simulated using representative props to demonstrate procedures. Complete shelter operations as completely as possible within prudent cost-benefit and logistics limit.

38.16.1.1 (Added) If exercise participants are required to actually reside in shelters, bedding, and linens must be provided IAW established procedures.

38.16.2. (Added) Do not implement actual full facility hardening procedures. Shelter OPRs and CE should demonstrate the capability and show resources and logistics are available.

38.16.3. (Added) Do not move medical personnel or stockage supplies to shelter. Prepare order message and paperwork only.

38.16.5. (Added) Ambulance Service personnel will not relocate to shelters during exercises. They will remain at the clinic to better respond to "Actual" emergencies. However, each crewmember should be familiar with shelter locations.

38.19.1. (Added) Civilian contractor personnel are exempt from participation unless required by contract. Service or construction projects will not be required to "stop work" due to the exercise scenario. All Department of the Air Force (DAF) civilian personnel are required to participate. Emergency essential DAF civilian employees participate as specified in AFI 36-507, *Mobilization of the Civilian Work Force*. Civilian overtime is at the discretion of the installation commander.

38.20.1. (Added) Activated UCCs will maintain an events log recording the completion of all significant events and major checklists items. Provide events logs to the BEET for evaluation following the exercise.

38.20.2. (Added) For required HQ AETC ORI (ACADEMIC SABER) exercises, maintain a written copy of all incoming and outgoing exercise correspondence in a separate folder (place classified and unclassified items in separate folders) for review by the AETC IG team chief on a daily basis. All written reports will be prepared with "**NOT FOR TRANSMISSION**" in the special instructions section of the message form and the DATE and TIME block will be left empty.

38.20.3. (Added) Messages will be released at the appropriate level and provided to the BEET Switch controller or the BEET evaluator within 24 hours.

38.20.4. (Added) For other higher headquarters directed exercises, contact with off-base agencies, exercise message preparation, and transmission will be IAW the appropriate exercise plan, SPINS, or other instruction.

38.21.1. (Added) When responding to off-base exercises, warning lights may be used to warn the public to use caution near the exercise site.

38.21.2. (Added) At least one pumper fire truck must be available to respond to "real-world" calls. If fire crew manning allows both pumpers to proceed to the exercise scene, only one structural pumper will be committed to connecting hydrant and hose lines. The other pumper will simulate these actions.

38.21.3. (Added) To avoid damage to buildings and/or fire-fighting equipment, fire crews will use charged lines outside of structures only. Use dry lines for interior operations.

38.25.1. (Added) To reduce excessive traffic build-up on city streets, Security Forces may show the capability to secure gates by simply closing the gates at a predetermined time. Coordinate with the BEET Chief before start of exercise.

38.27.2.1. (Added) BEET or IG perpetrators/participants will verbally respond to the question "Are you a BEET/IG role player?" SFS will treat persons not responding as a BEET/IG role player accordingly.

38.27.3.1. (Added) Exception: Aggressor forces may use actual weapons and blank ammunition during CONEXs.

38.28. (Added) **Exercise Participation.** The following additional guidelines for exercise participation apply at Maxwell/Gunter.

38.28.1. (Added) Units and assigned agencies will participate in FPCONs, treating inputs as if they are "real-world." They should have a plan to demonstrate capability to evacuate the building should the scenario require it. Once the capability is demonstrated, personnel will immediately return to work.

38.28.2. (Added) Voluntary participation of on-base dependents is encouraged

38.28.3. (Added) Airman Leadership School classes and similar activities which require temporary duty attendance or expenditure of funds by other organizations are exempt from exercises.

38.28.4. (Added) The Youth Center and Child Development Center will be excluded from exercises requiring evacuation; however, the staff should be prepared to brief an evaluator on actions they would take if the exercise were an actual situation. At the discretion of the Wing Commander and/or Support Group Commander, the hours of the center may be extended in support of personnel participating in exercises.

39.1.1. (Added) The discrepancy list will include name, team, UTC, ULN, and organization. Provide a copy of the list, along with two copies of orders and the Deployment Requirements Manning Document to the BEET/IG personnel inspector upon completion of processing.

39.3.1. (Added) When a team or chalk (passenger and cargo) is ready to deploy, notify the BEET/IG transportation inspector and hold the team or chalk until inspected. Provide the inspector with a copy of all personnel manifests, cargo manifests, Shipper's Declaration of Dangerous Goods, DD Forms 1387-2, **Special Handling Data/Certification**, and other documentation generated during the exercise if applicable to the team being exercised.

39.5.1. (Added) Identify any simulated personnel on the orders with an "S." AU/FM personnel will initial orders to verify fund cite and AU/FM coordination.

39.5.2. (Added) Prepare functional mobility equipment (FME) transfer, but do not run or actually transfer equipment custody. Instead of an FME card deck, use alternate procedures (CA/CRLs, surge program, etc.) to simulate transfer of equipment accountability.

39.6. (Added) Units tasked to backfill equipment shortages will surrender equipment to the deploying unit. The deploying unit will sign a hand-receipt taking responsibility for the equipment. Accomplish the appropriate paperwork to accompany the transfer of equipment accountability; however, do not complete the transfer of accounts. Items impossible to move or issue will have the appropriate paperwork accomplished. If equipment transfer would severely disable the mission of the losing agency, the unit will submit a "LIMFAC" report to the BEET Chief. This report must be accomplished within seven working days after the exercise and include the resource in question, where in the scenario the problem took place, and the overall effect on the mission.

39.7. (Added) Orders or certified true exact copies of orders published for exercises not requiring actual TDY are not authenticated; however, all other information is included. Exercise orders prepared in accordance with this paragraph do not require revocation.

39.8. (Added) Deployment team members and equipment, once deployed, are not used further in the exercise. Release personnel to their quarters or duty station to accomplish non-exercise related duties. Equipment identified for deployment is set aside. Team members and equipment are available upon termination of the exercise.

39.9. (Added) Do not transport ammunition, weapons, or other hazardous/sensitive cargo to the marshaling area without prior coordination with the Deployment Control Center (DCC).

39.10. (Added) Personnel substitutions or backfills should be in accordance with Air Force Instructions, unless otherwise noted in the deployment order. Exercise initiated actual deployments are considered peacetime exercises.

39.11. (Added) Each station on the Personnel Processing Line (PPL) will maintain a list of identified errors. Submit the list with two copies of orders and Mobility Requirements Resource Roster (MRRR) to the BEET Chief upon completion of processing.

39.12. (Added) Do not count team members who are on TDY or on leave in the local area who could have been recalled during an actual emergency as shortfall. Simulate as present and processed (records only) during mobility exercises.

39.13. (Added) The PPL medical station will be staffed by medical personnel qualified to administer immunizations.

39.14. (Added) Medical records for deploying personnel can be pulled from the appropriate outpatient team records section to demonstrate capability. However, only representative props of boxed medical records will be sent to the PPL. Actual medical records will remain in the clinic records room.

39.15. (Added) Provide the DCC BEET evaluator a copy of all required messages to be released during the course of the exercise. Also, provide a copy of the DCC charts and events logs immediately after completion of the exercise.

39.16. (Added) Prepare FME images on a Flat File but do not run, nor actually transfer equipment custody. Instead of the Flat File, use alternate procedures (CA/CRLs, 80-80 listings, etc.) to simulate transfer of equipment accountability.

39.17. (Added) Personnel substitutions and backfills must comply with higher headquarters instructions, unless otherwise specified in the deployment order. ORI initiated actual deployments are considered peacetime exercises.

39.18. (Added) For simulated movements, stamp TDY orders with **“For Exercise Only, Do Not Process.”** Use fictitious special order numbers beginning with “0001.” Identify all personnel simulations on orders with a “Z” under the remarks section.

39.19. (Added) The Command Post will prepare required LIMFAC and SITREPs to identify any shortfalls in either equipment or personnel not previously approved by the wing commander before STARTEX.

39.20. (Added) Provide the logistics plans BEET evaluator a copy of all required deployment messages to be released during the course of the exercise. Also, provide a copy of the deployment control center and cargo deployment function charts and events log immediately after completion of the exercise.

NOTE: *The following are added to Attachment 1:*

Abbreviations and Acronyms (added)(MAFB)

AAFES—Army and Air Force Exchange Service

AFOATS—Air Force Officer Accession and Training Schools

AFOSI—Air Force Office of Special Investigations
ALF—Airlift Flight
AU—Air University
AW—Airlift Wing
BEET—Base Exercise Evaluation Team
BX—Base Exchange
CA/CRL—Custody Account/Custodial Receipt Listing
CADRE—College for Aerospace, Doctrine, Research and Education
CAT—Crisis Action Team
CCAF—Community College of the Air Force
CDC—Child Development Center
CE—Civil Engineering
DCC—Deployment Control Center
DECA—Defense Commissary Agency
DV—Distinguished Visitor
EOD—Explosive Ordnance Disposal
FME—Functional Mobility Equipment
FPCON—Force Protection Condition
GOV—Government Owned Vehicle
IAW—in accordance with
IG—Inspector General
ILS—xxx xxx
LIMFAC—Limiting Factor
LG—Logistics
MFH—Military Family Housing
MRRR—Mobility Requirements Resource Roster
MSG—Mission Support Group
NOTAM—Notice to Airmen
OPR—Office of Primary Responsibility
OTS—Officer Training School
PCC—Personnel Control Center
PME—Professional Military Education
PPL—Personnel Processing Line
SITREP—Situational Report
SPINS—xxxxx
SF—Security Forces
SFS—Security Forces Squadron
SVS—Services Squadron
TACAN STN FIX—xxx xxx
TDY—Temporary Duty
TWR NAVADS—xxx xxx
UCC—Unit Control Center
ULN—Unit Line Number

VAQ—Visiting Airman's Quarters

WAPS—Weighted Airman Promotion System

FRANCES C. MARTIN
Colonel, USAF
Commander
