

MAFB School Liaison Program Managers

PreK-12th grade Educational Resources

26 Apr 2024

We know that educational options are an important part of every PCS. That's why your School Liaison Program Managers are ready to help. If you have not already received a welcome packet from our office, please reach out and let us know. This packet has valuable resources to help you make informed educational decisions for your PreK(4) - 12th grade children.

Will you be living on base or off base? Depending on where you live, your school options may be different. Please contact your school liaison office for more information on school options.

Residents that live in base housing and the Fam Camp can send their children to the DoDEA school on base. The DoDEA school on base is Maxwell Elementary & Middle School (MEMS), which serves students grades PreK(4)-8th grade. Transportation is provided for students living on Gunter Annex to MEMS, while families living on Maxwell are responsible for transportation. Another option for base residents is to have your child attend the zoned schools for Maxwell or Gunter within the Montgomery Public School (MPS) system, apply for a MPS magnet school, out-of-district programs with one of our partnering school districts (call the school liaison for details), private schools, or participate in homeschooling.

Contact your losing and gaining School Liaison when preparing for a PCS!

What is the DoDEA Pilot program?

The DoDEA Pilot at MEMS allows eligible military personnel living off base to have their children attend the DoDEA school after submitting an application and being accepted. More information on the pilot program can be found on the MEMS website. Scan the QR code to go to the website.

Our local area has 78 Purple Star schools. A Purple Star school is one that is committed and supportive of military students and their families as they transition to their new homes and schools.

Make sure you pay attention to application deadlines for the MPS Magnet schools, Alabama First Class PreK (4), and register for the MEMS Pilot Program ASAP if this option is available to your family.
