

MAFB School Liaison Program Managers

PreK-12th grade Educational Resources

13 Jul 2026

Educational options are an important part of every PCS. That's why your School Liaison Program Manager is ready to help. If you have not already received a welcome packet from the School Liaison office, please reach let me know. This packet has valuable resources to help you make informed educational decisions for your PreK(4) - 12th grade children.

Will you be living on base or off base? Depending on where you live, your school options may be different. Please contact your school liaison office for more information on school options.

Residents who live in base housing and the Fam Camp can send their children to the DoWEA school on base. The DoWEA school on base is Maxwell Elementary & Middle School (MEMS), which serves students grades PreK(4)-8th grade. Transportation is provided for students living on Gunter Annex and the Fam Camp to MEMS, while families living in Maxwell permanent housing are responsible for their own transportation. Another option for base residents is to have your child attend the zoned schools for Maxwell or Gunter within the Montgomery Public School (MPS) system, apply for a MPS magnet school, out-of-district programs with one of our partnering school districts (call the school liaison for details), private schools, or participate in homeschooling.

Always contact your losing and gaining School Liaison when preparing for a PCS!

What is the DoWEA Expanded Eligibility Enrollment Option?

This program allows active-duty members with orders to Maxwell AFB/ Gunter Annex living off installation the option to apply for a seat at the DoWEA school. Families need to apply and be accepted into the program. More information on the pilot program can be found on the MEMS website. Scan the QR code to go to their website.

A Purple Star school is one that is committed and supportive of military students and their families. Each school will have a military liaison to help you as you transition into the school.

Make sure you pay attention to application deadlines for the MPS Magnet schools, Alabama First Class PreK (4), and register for the MEMS Pilot Program ASAP if this option is available to your family.
